Non-invasive cancer treatment

NEW DELHI, 3 OCT: Max Healthcare has started using non-invasive Novalis Tx Radiosurgery for cancer treatment. This technology is most precise and can treat cancerous and non-cancerous parts of the brain and the body.

Speaking on the occasion, Deputy Chairman, Planning Commission, Montek Singh Ahluwalia, said, "Expenditure on health, especially public part, is low. We are encouraging public-private partnership to enhance the existent health facilities in our country". **sns**
