Institute of Minimal Access,
Metabolic & Bariatric Surgery

CLINICAL FELLOWSHIP IN ENDOSCOPIC HERNIA SURGERY

Endoscopic hernia repair is being increasingly performed by surgeons practising minimal access surgery. A large number of these procedures are conducted at Max Institute of Minimal Access, Metabolic & Bariatric Surgery, Saket, New Delhi.

In an effort to provide high quality practical training, the department has established a structured training course in various aspects of laparoscopic hernia repair. The course content includes an introduction to groin endoanatomy, extraperitoneal access techniques, surgical dissection techniques, various meshes and fixation devices. The duration of the course is one month and is suitable for surgeons proficient in basic laparoscopic surgery. At the end of the course, surgeons should be able to independently perform endoscopic totally extraperitoneal groin hernia repair in well selected patients.

The above fellowship is stipendary.

Interested candidates may kindly apply with a detailed CV to :

Dr. Pradeep K Chowbey
