

Introducing 'My Baby', Max Healthcare's Centre for IVF & Reproductive Medicine.

One in seven couples who try for a baby, experience delays in conceiving. Conception is a complex process that involves many factors and even in case of a completely healthy couple, 15-20* percent of women are unable to conceive post 1 year of regular intercourse.

In Vitro Fertilisation (IVF) is an assisted conception technique that helps couples with fertility issues, who're unable to conceive. Max Centre for IVF & Reproductive Medicine is a dedicated, one-stop facility that addresses and treats the entire gamut of fertility problems.

Our team of internationally trained and experienced fertility

specialist gynaecologists, skilled embryologists and trained technical staff will take care of you all through the treatment process.

At our IVF Centre, we provide:

- Comprehensive Guidance
- Advanced Assisted Reproduction Technology
- Andrology Services
- Home Care
- Day Care Services

Max Centre for IVF & Reproductive Medicine

Caring for you... for life
