

A photograph of a man in profile, wearing a white hospital gown, looking out a window with vertical blinds. The scene is dimly lit, with light coming from the window, creating a contemplative mood.

Early screening. It's our only safeguard against cancer.

A condition that is likely to affect one in every fifteen men and one in ten women, in India, can only be overcome through early screening. The earlier cancer is diagnosed, the greater a patient's chances of recovery.

Thankfully, Max Healthcare is well-equipped to facilitate comprehensive screening methods, and provide best-in-industry treatment, care and rehabilitation to cancer patients.

'Cancer' may come before 'detection' in the dictionary. Life, however, demands that screening and detection come first.

Screening packages, starting from Rs. 1000 onwards, are available at Max Cancer Centre.
