

# Child Health Screening Programme

**Children (5-10 yrs):** Preventive healthcare focuses on your child's health by monitoring his/her development. It also helps in prevention and early detection of illness or diseases. It incorporates a thorough physical examination, Laboratory investigations and developmental & behavioral assessment. It is important to undergo dental check up in order to keep the teeth and gums healthy. ENT check is required to rule out any residual ear or Sinus disease and their effects due to ENT infections in childhood. In addition, the parents can address any concerns they have about their child with Paediatrician.
